### **ESI Instructions**

3. **ESI Production Format.** *ESI* shall be produced electronically, either in (1) *Native Format*, or (2) as single-page, uniquely and sequentially numbered Group IV *TIFF* image files. For each *ESI document*, all metadata must remain intact and all parent/child document relationships must be maintained. All *ESI* shall be collected using methods that prevent the spoliation of data.

4. **Production Media.** The production of *ESI* as described herein shall be made on an external hard drive, flash drive, CD or DVD (“*Production Media*”). The *Production Media* shall include a unique identifying label specifying: (a) *your* identity; (b) the date of the production of *ESI*; and (c) the Lawsuit name and number.

5. ESI of Limited Accessibility. If you contend that any *ESI document* responsive to this Request for Production is not reasonably accessible: (1) timely identify such *ESI document* with reasonable particularity; and (2) provide the basis for declining to produce the *ESI document*, including, for example, any limitations on access, the likely costs that might be incurred in accessing and producing the *ESI document*, the method used for storage of the *ESI document* and all locations in which the *ESI document* is kept.

6. TIFF Production. *ESI* produced as *TIFF* image files shall be produced as follows: (1) each production of *TIFF* image files shall be accompanied by a corresponding load file (“*Image Load File*”); (2) each *TIFF* image file must contain the same information and same physical representation as the *Native Format* file from which the *TIFF* image file was created; (3) each *TIFF* image file must not be less than 300 dpi resolution; (4) each *TIFF* image file shall be accompanied by an extracted text file containing the extracted text of the *Native Format* file from which the *TIFF* image file was created; (5) each extracted text file shall be named to match the endorsed number assigned to the first page of each corresponding *TIFF* image file; (6) the extracted text files shall be accompanied by a Control List File (“*LST*”); (7) each production of *TIFF* image files shall be accompanied by an image cross-reference load file, such as Opticon (“*OPT*”), which shall provide the beginning and ending endorsed number of each *TIFF* image file and the number of pages it includes; and (8) each production of *TIFF* image files must be accompanied by a data load file (“*Data Load File*” or “*DAT*”) that contains both the hash value and all available metadata of the *Native Format* files from which the *TIFF* image files were created. Further, the following instructions apply to the production of *TIFF* image files:

- a. Processing Specifications. For each *Native Format* file that is converted to *TIFF* format: (1) all tracked changes shall be maintained so that all changes

are visible; (2) OLE Embedded files shall not be extracted as separate documents; (3) author comments shall remain or be made visible; (4) hidden columns, cells, rows, worksheets and other hidden data shall remain or be made visible; (5) presenter notes shall remain or be made visible; and (6) to the extent *ESI* in a foreign language is produced, processing of such *ESI* shall be unicode-compliant.

- b. Document Unitization. If a *Native Format* file that is converted to *TIFF* format is more than one page, the unitization of the file and any attachments or affixed notes must be maintained as it existed when collected. If unitization cannot be maintained, the original unitization must be documented in the *Data Load File* or otherwise electronically tracked.
- c. Color. If a *Native Format* file that is converted to *TIFF* format contains color, the *TIFF* image file need not be produced in color. However, we reserve the right to make a request for a file to be produced in color.
- d. Where *TIFF* Image File Format is Impracticable. In the event that production of a *Native Format* file as a *TIFF* image would be impracticable, you shall produce such file in *Native Format* with all metadata intact. You shall provide a single page *TIFF* image placeholder referencing the title of the *Native Format* file not being produced as a *TIFF* image.
- e. Spreadsheets. All Microsoft Excel files, similar non-Microsoft spreadsheet files, and graphical compilations of spreadsheet data, shall be produced in *Native Format* with all cells, columns, rows and worksheets and other information unhidden and expanded.

- f. Right to Request Native Format files. We reserve the right to demand production in *Native Format* of any file produced by you as a *TIFF* image file.

### **REQUEST FOR PRODUCTION**
